

QUANTUM  
FLAGSHIP

# The Quantum Technologies Flagship

8 N O V E M B E R 2 0 1 9

Tommaso Calarco  
Quantum Flagship Community Network

# WHAT ARE QUANTUM TECHNOLOGIES?

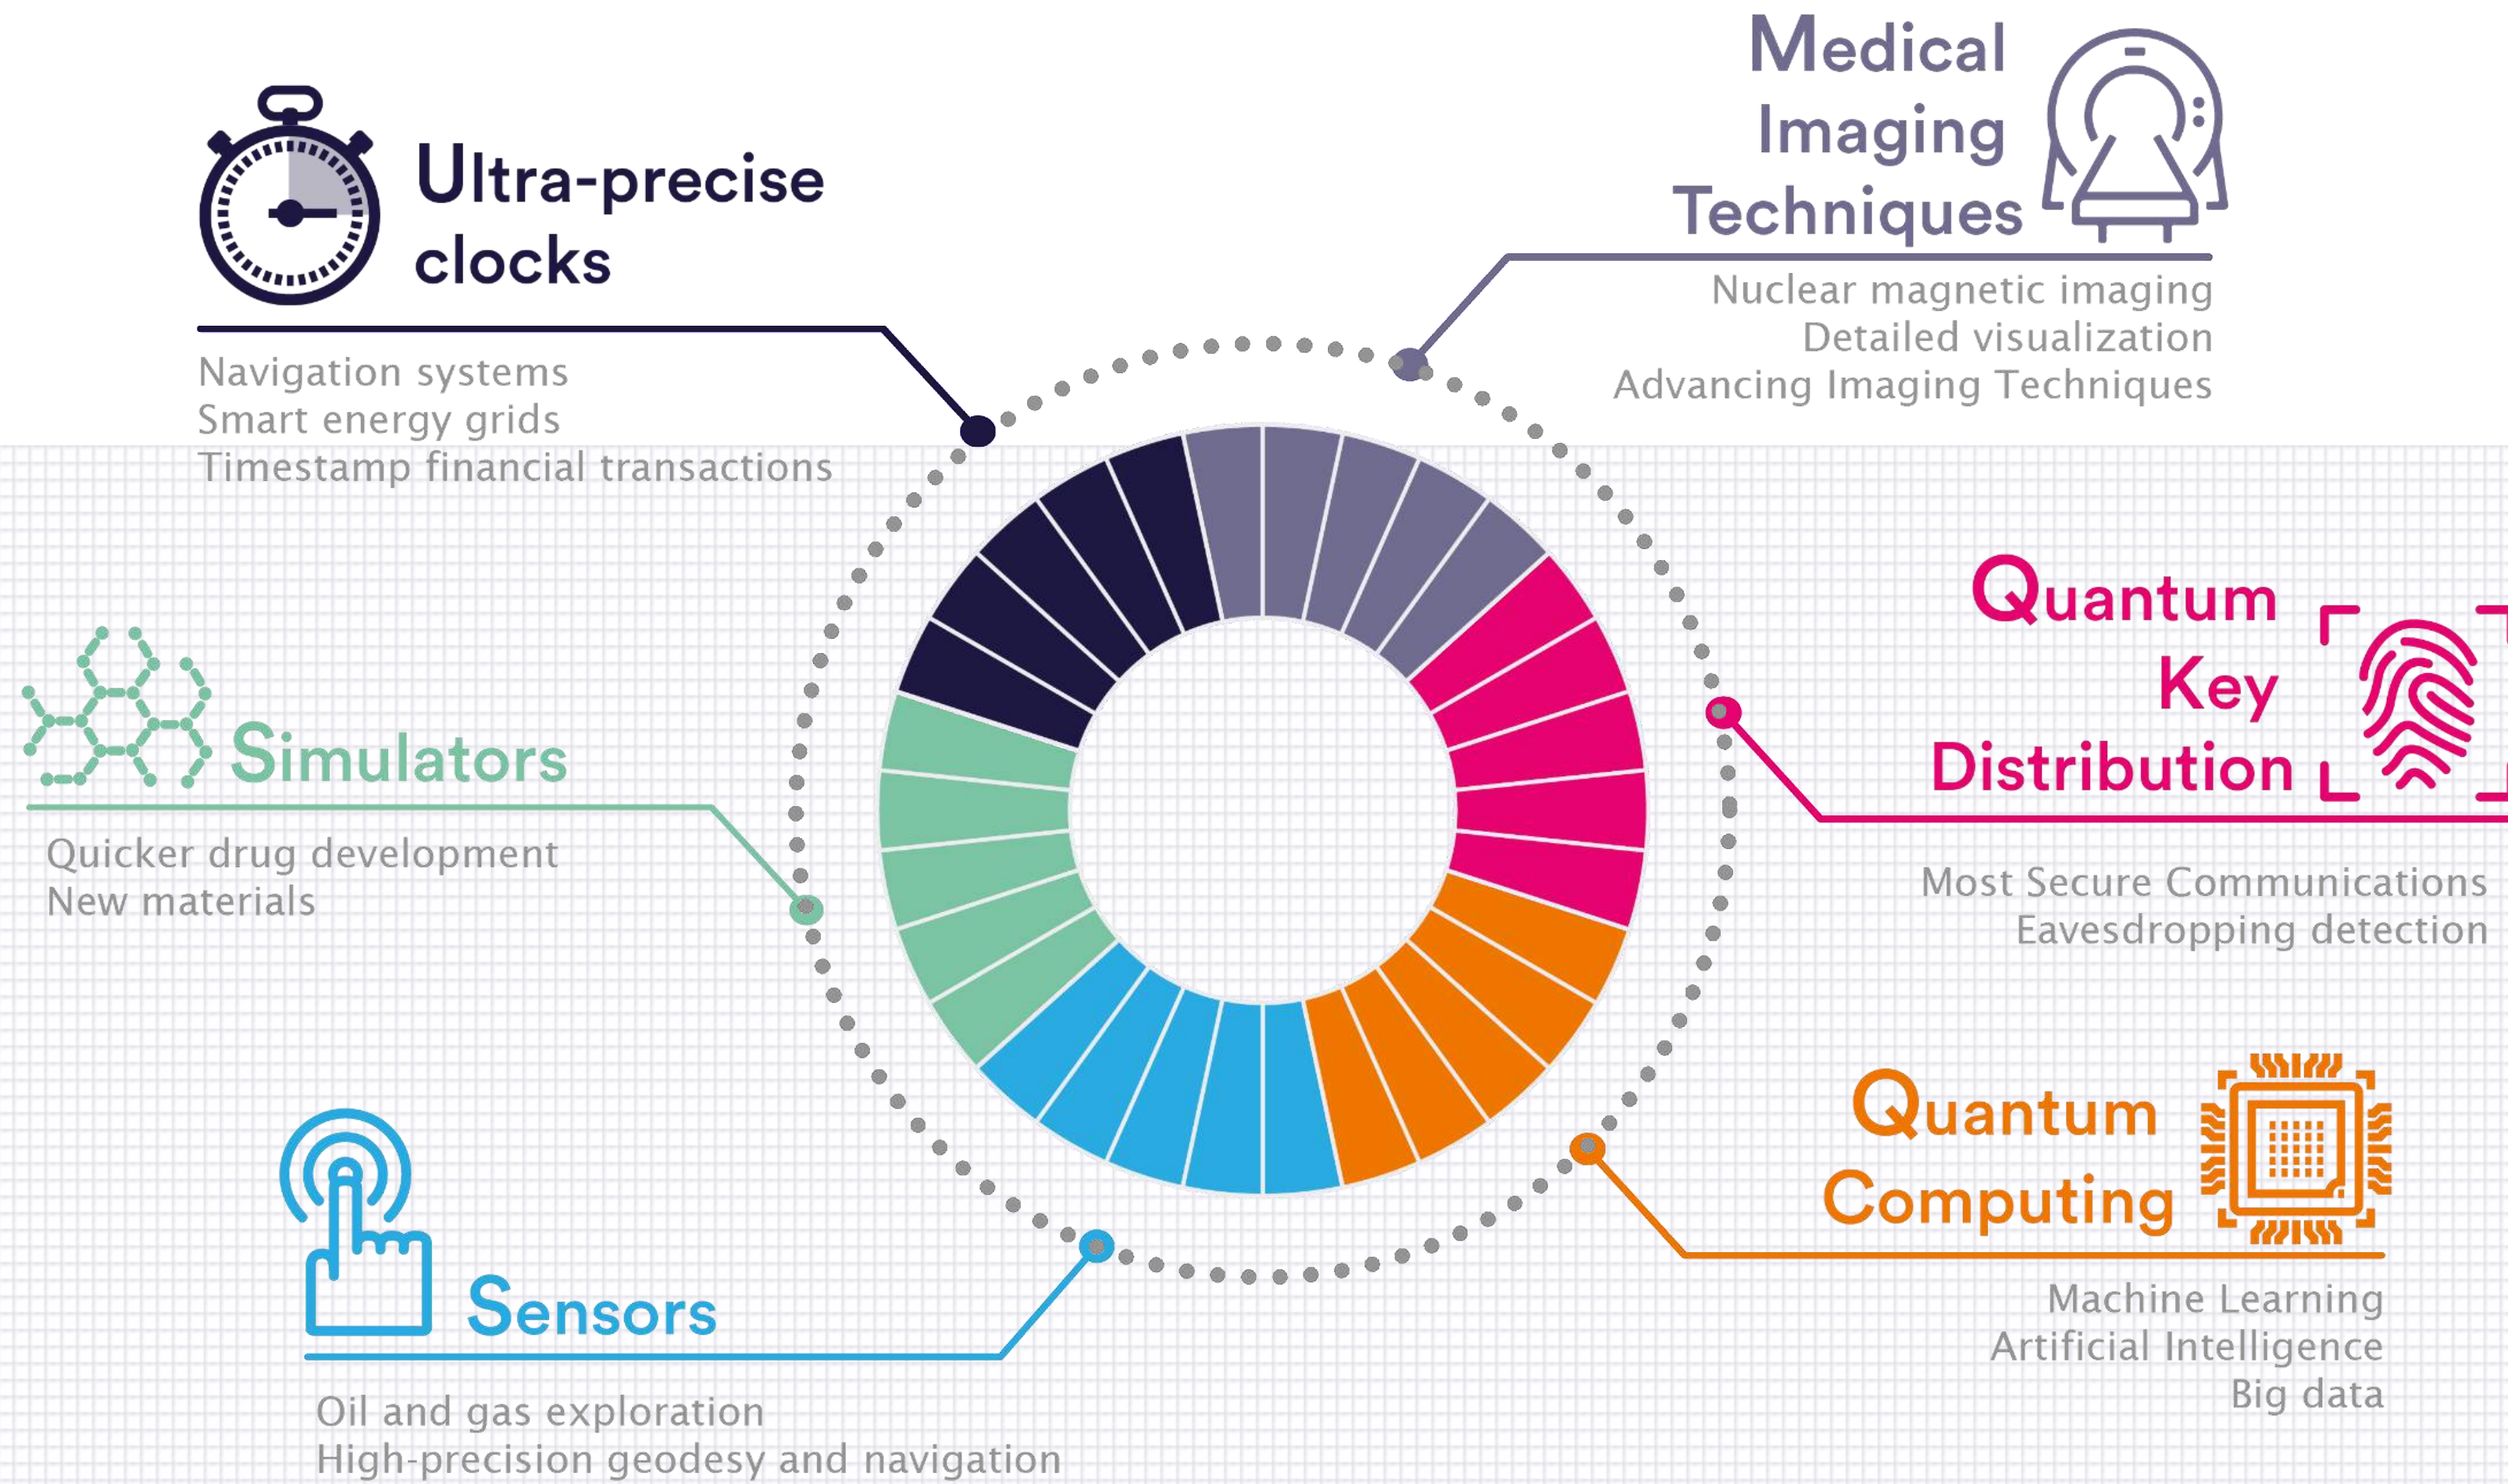

**QUANTUM TECHNOLOGIES**  
DEVICES & SYSTEMS

REVOLUTIONARY IMPROVEMENTS  
INDUSTRY & MARKET

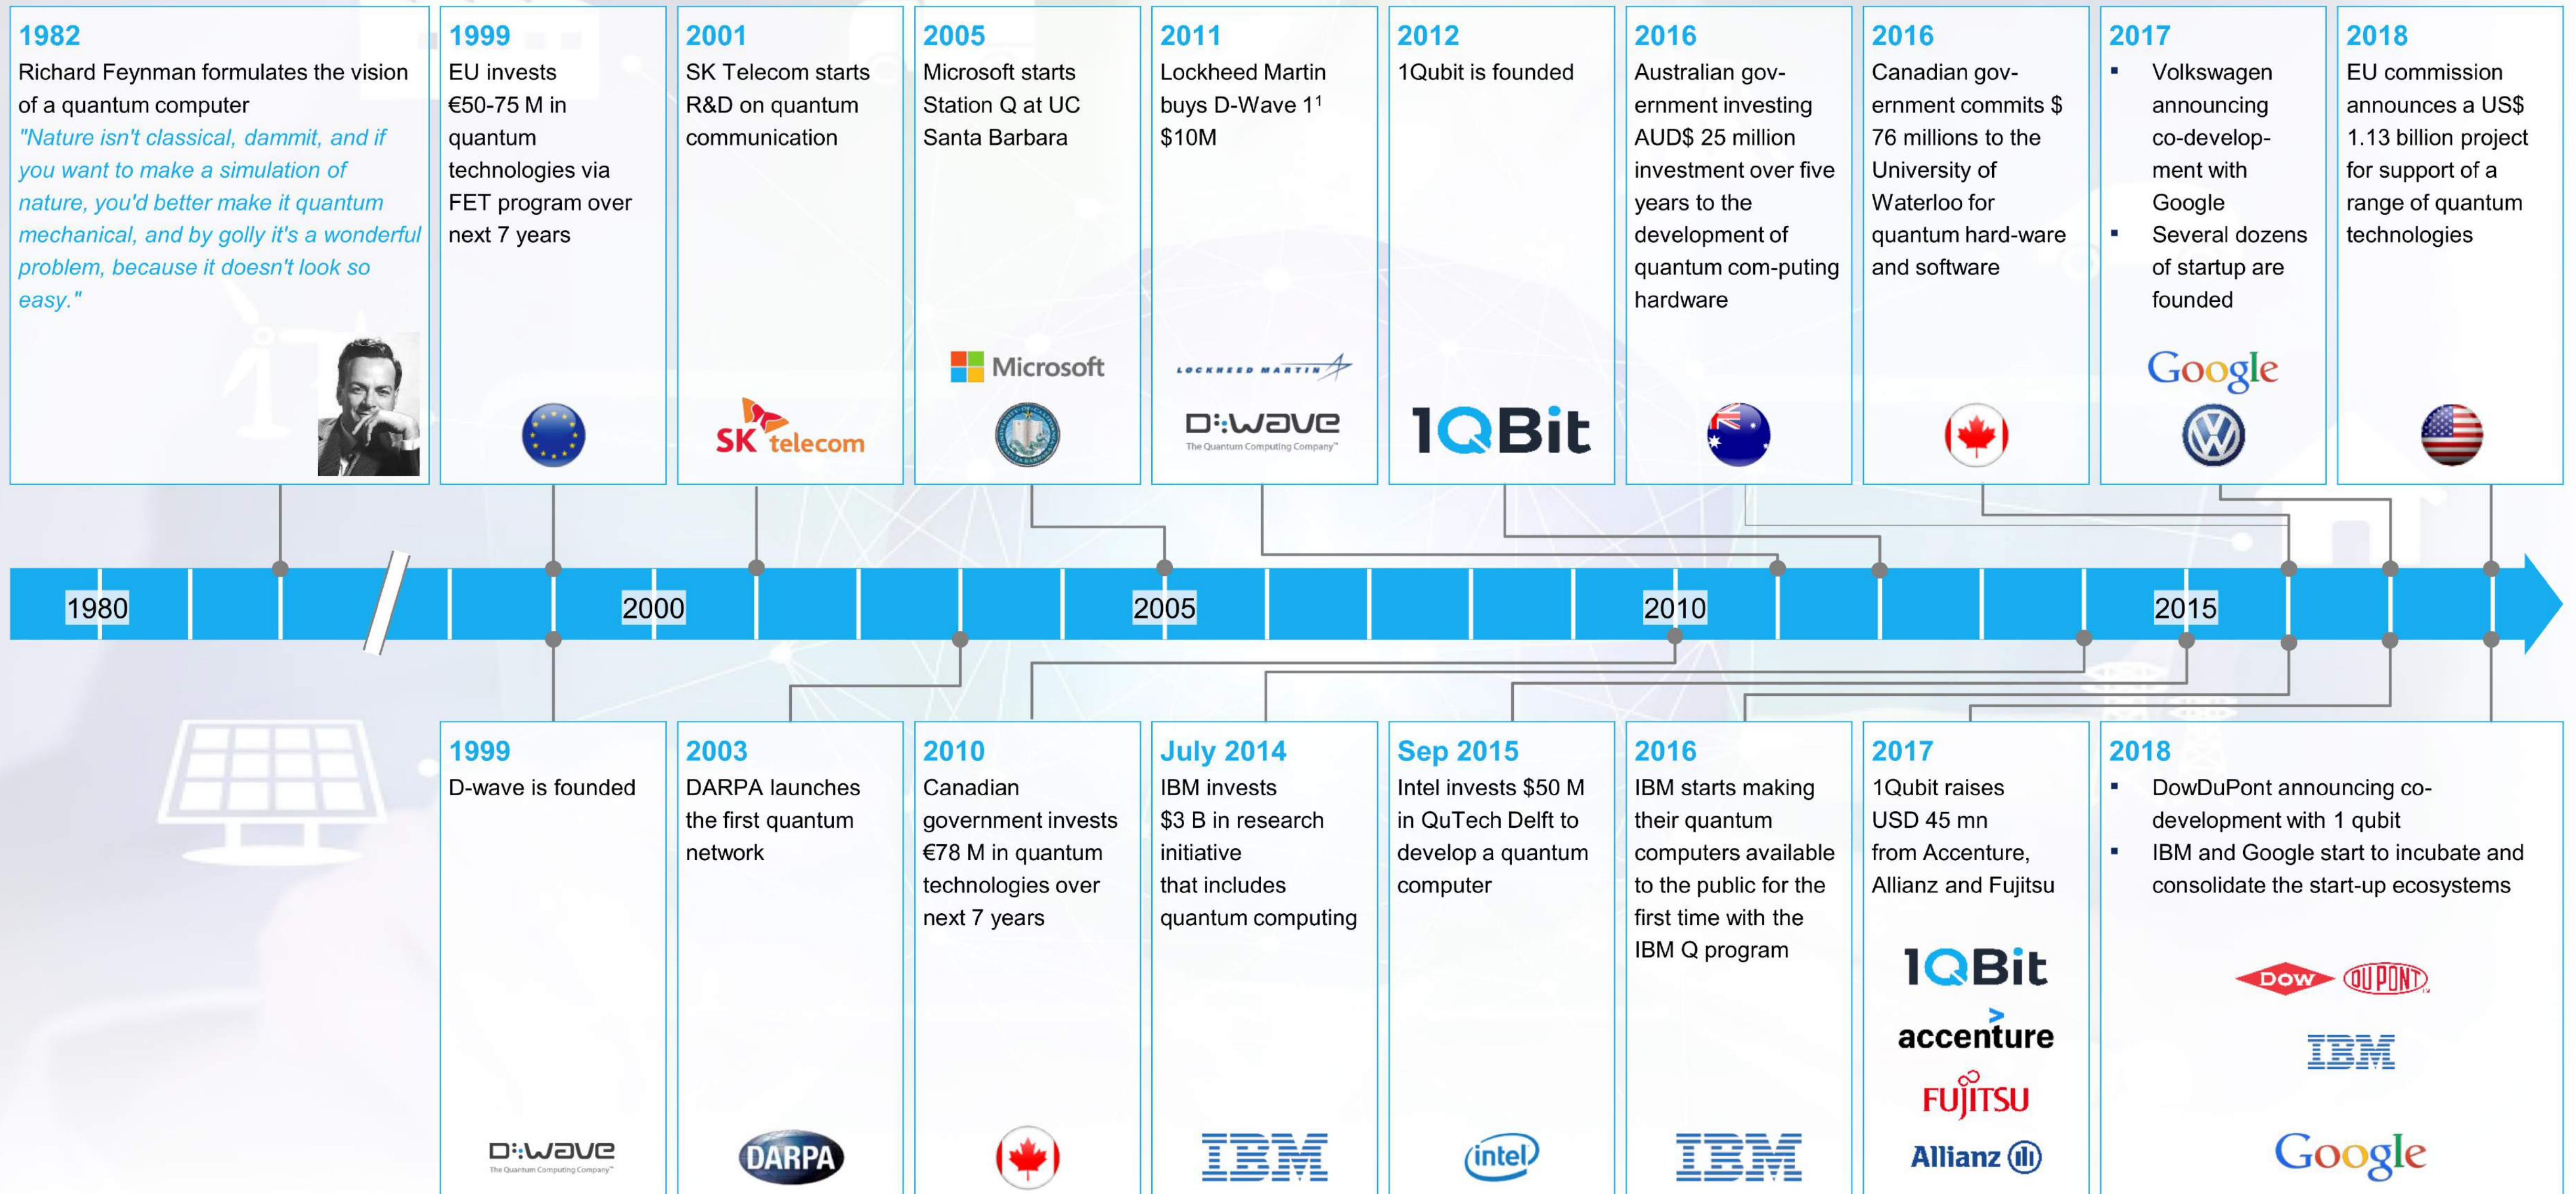

# QUANTUM TECHNOLOGY APPLICATIONS

# 1 The development of quantum computers started in 1982, but accelerated drastically in the past two years

NOT EXHAUSTIVE

## 2 Four distinct quantum tools may enable use cases across industries – the capabilities rely on dedicated quantum algorithms

### Quantum tool

### Example

#### Quantum simulation for chemicals and materials

- **Simulation of quantum systems for R&D on chemicals**, i.e. molecules, solids or polymers
- Scope ranging from **small molecules** up to huge **macro-molecules**, e.g., proteins
- Use of **variational quantum eigensolver** (VQE) and quantum subspace expansion (QSE) as algorithms

#### Optimization

- Solving of **numeric optimization problems** with a **large number** of **variables**, e.g., in **manufacturing** and **finance**
- **Optimization** in business **operations** like **supply chain, logistics**

#### AI and machine learning

- Better algorithms for **AI/machine learning**
- Potential applications in **manufacturing** or **pharma** (optimizing formulations, identifying APIs)

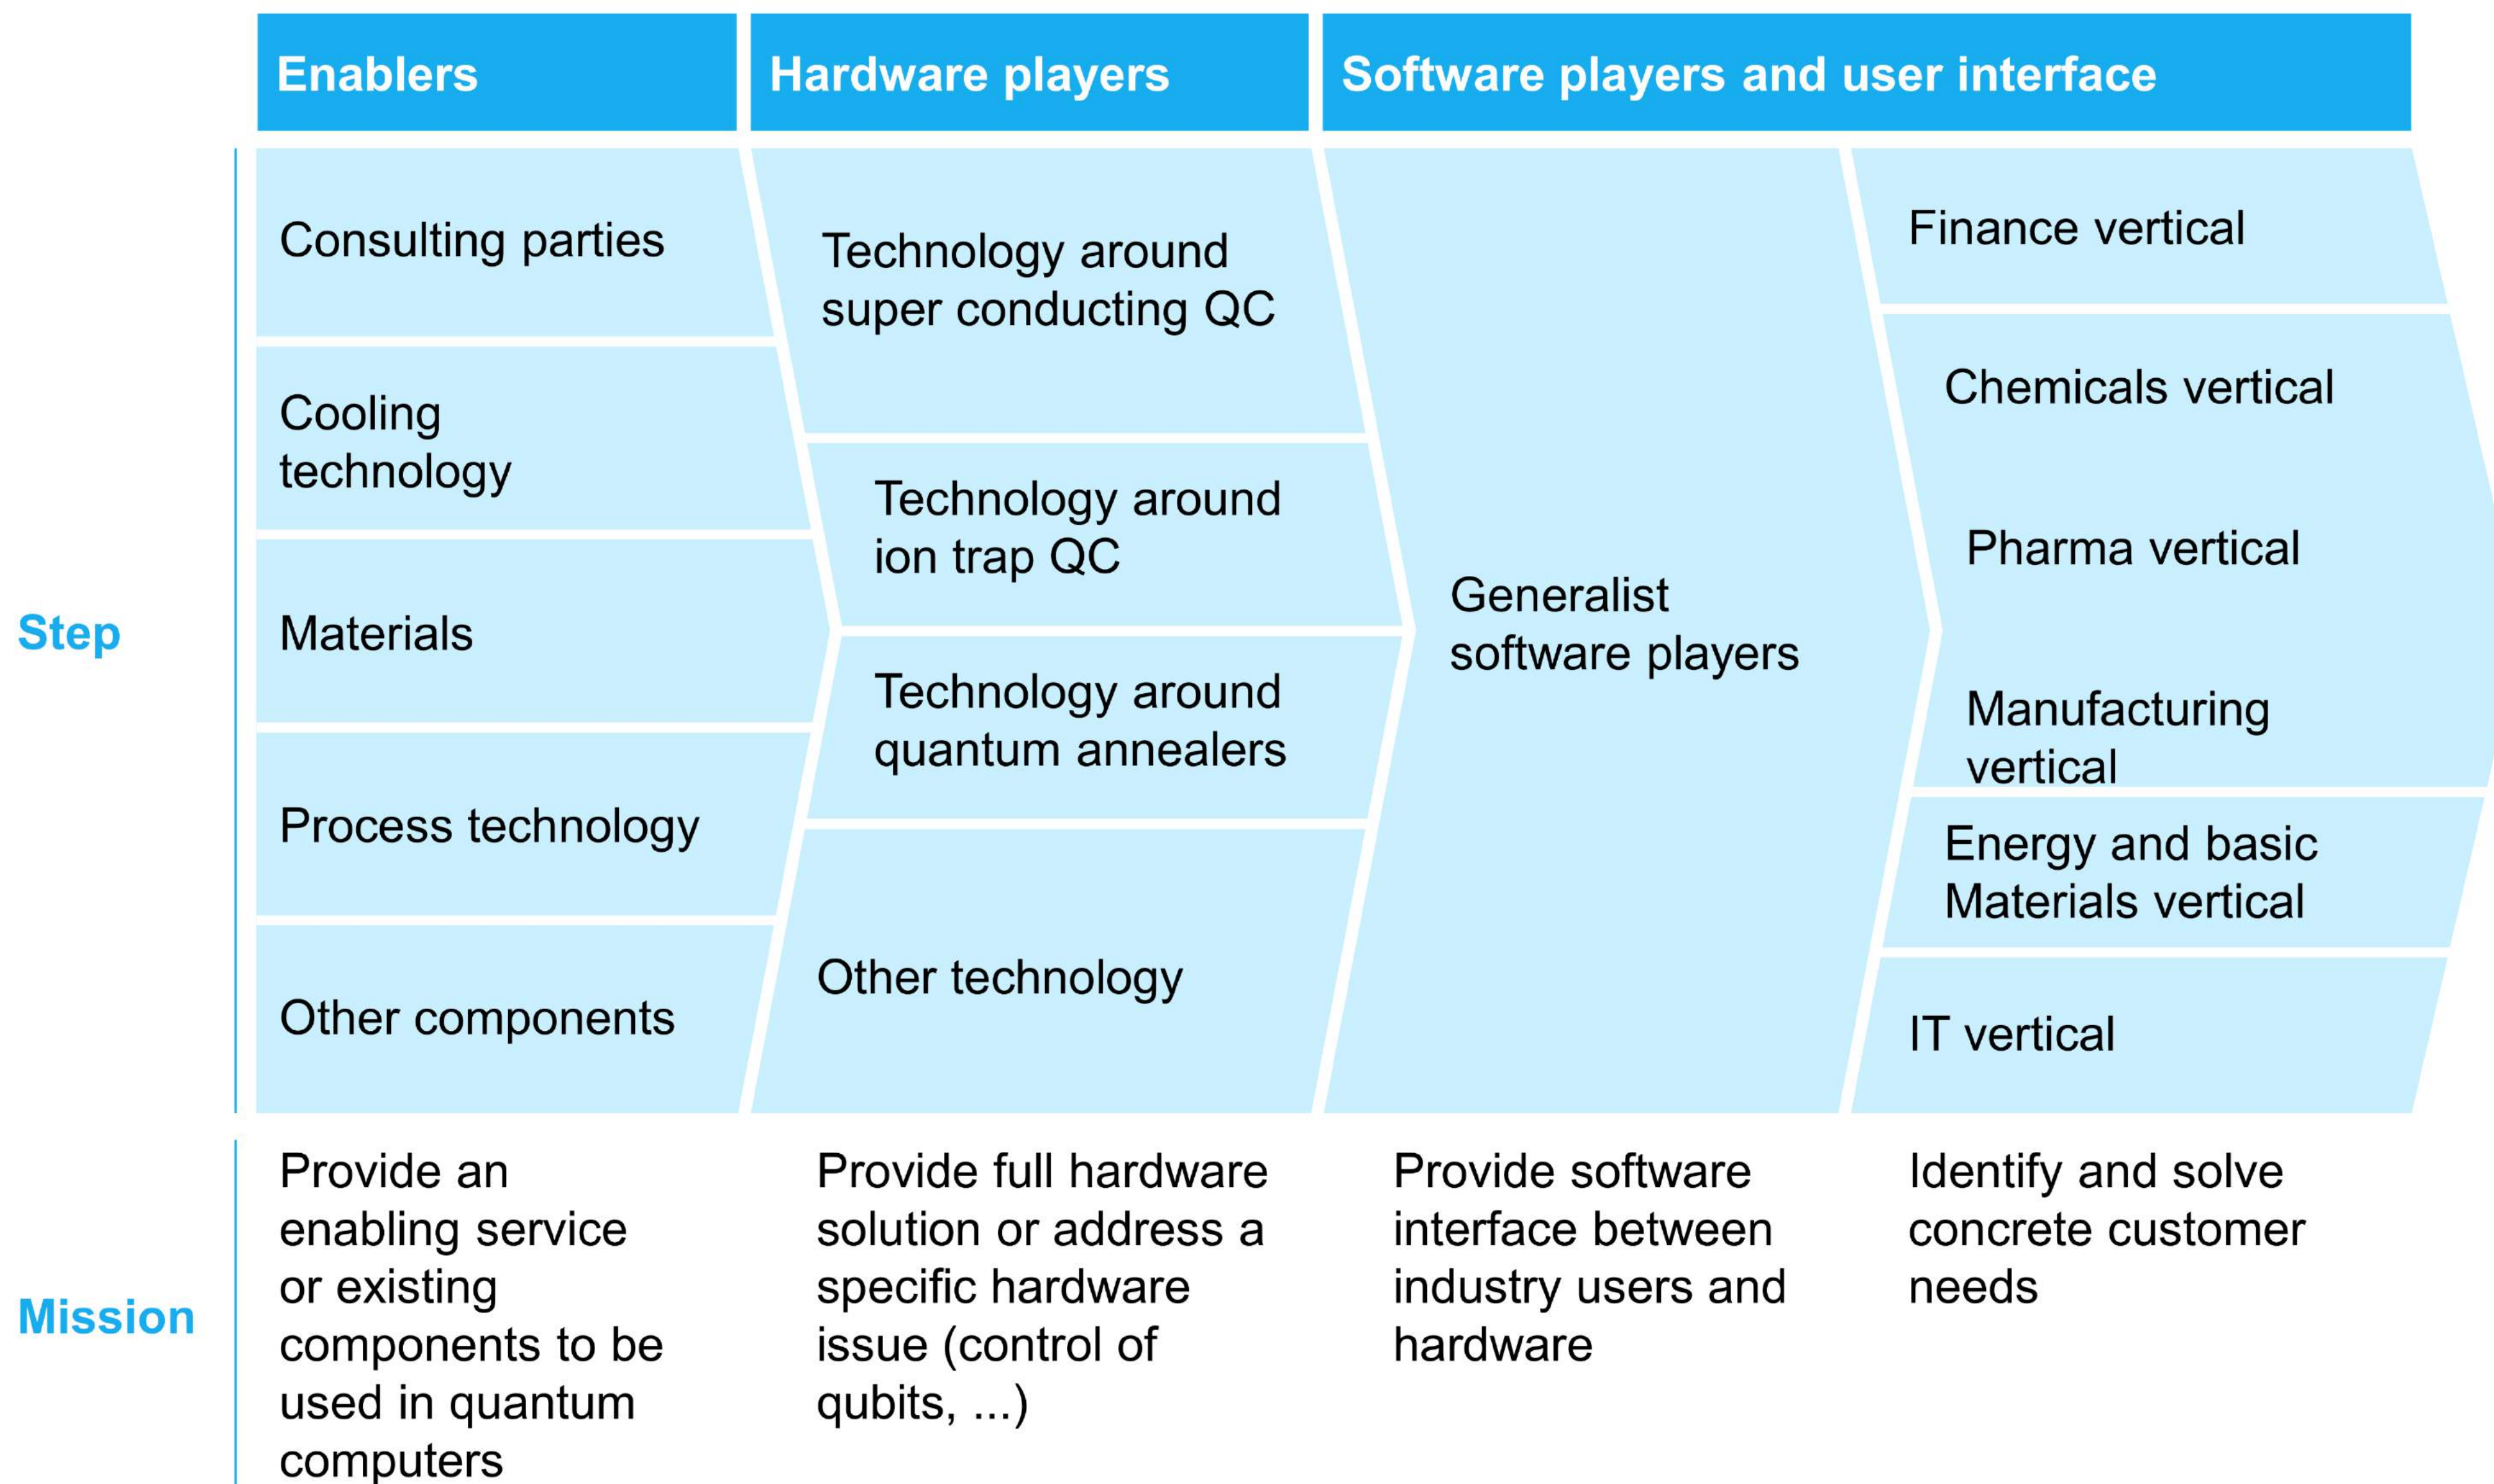

#### Prime factorization to crack/create encryption

- **Handling of larger prime numbers** (factorization)
- **Encryption breaking** to get access to (military) intelligence
- Creation of safer communication systems and securing of critical data for finance
- Use of **Shor's** algorithm

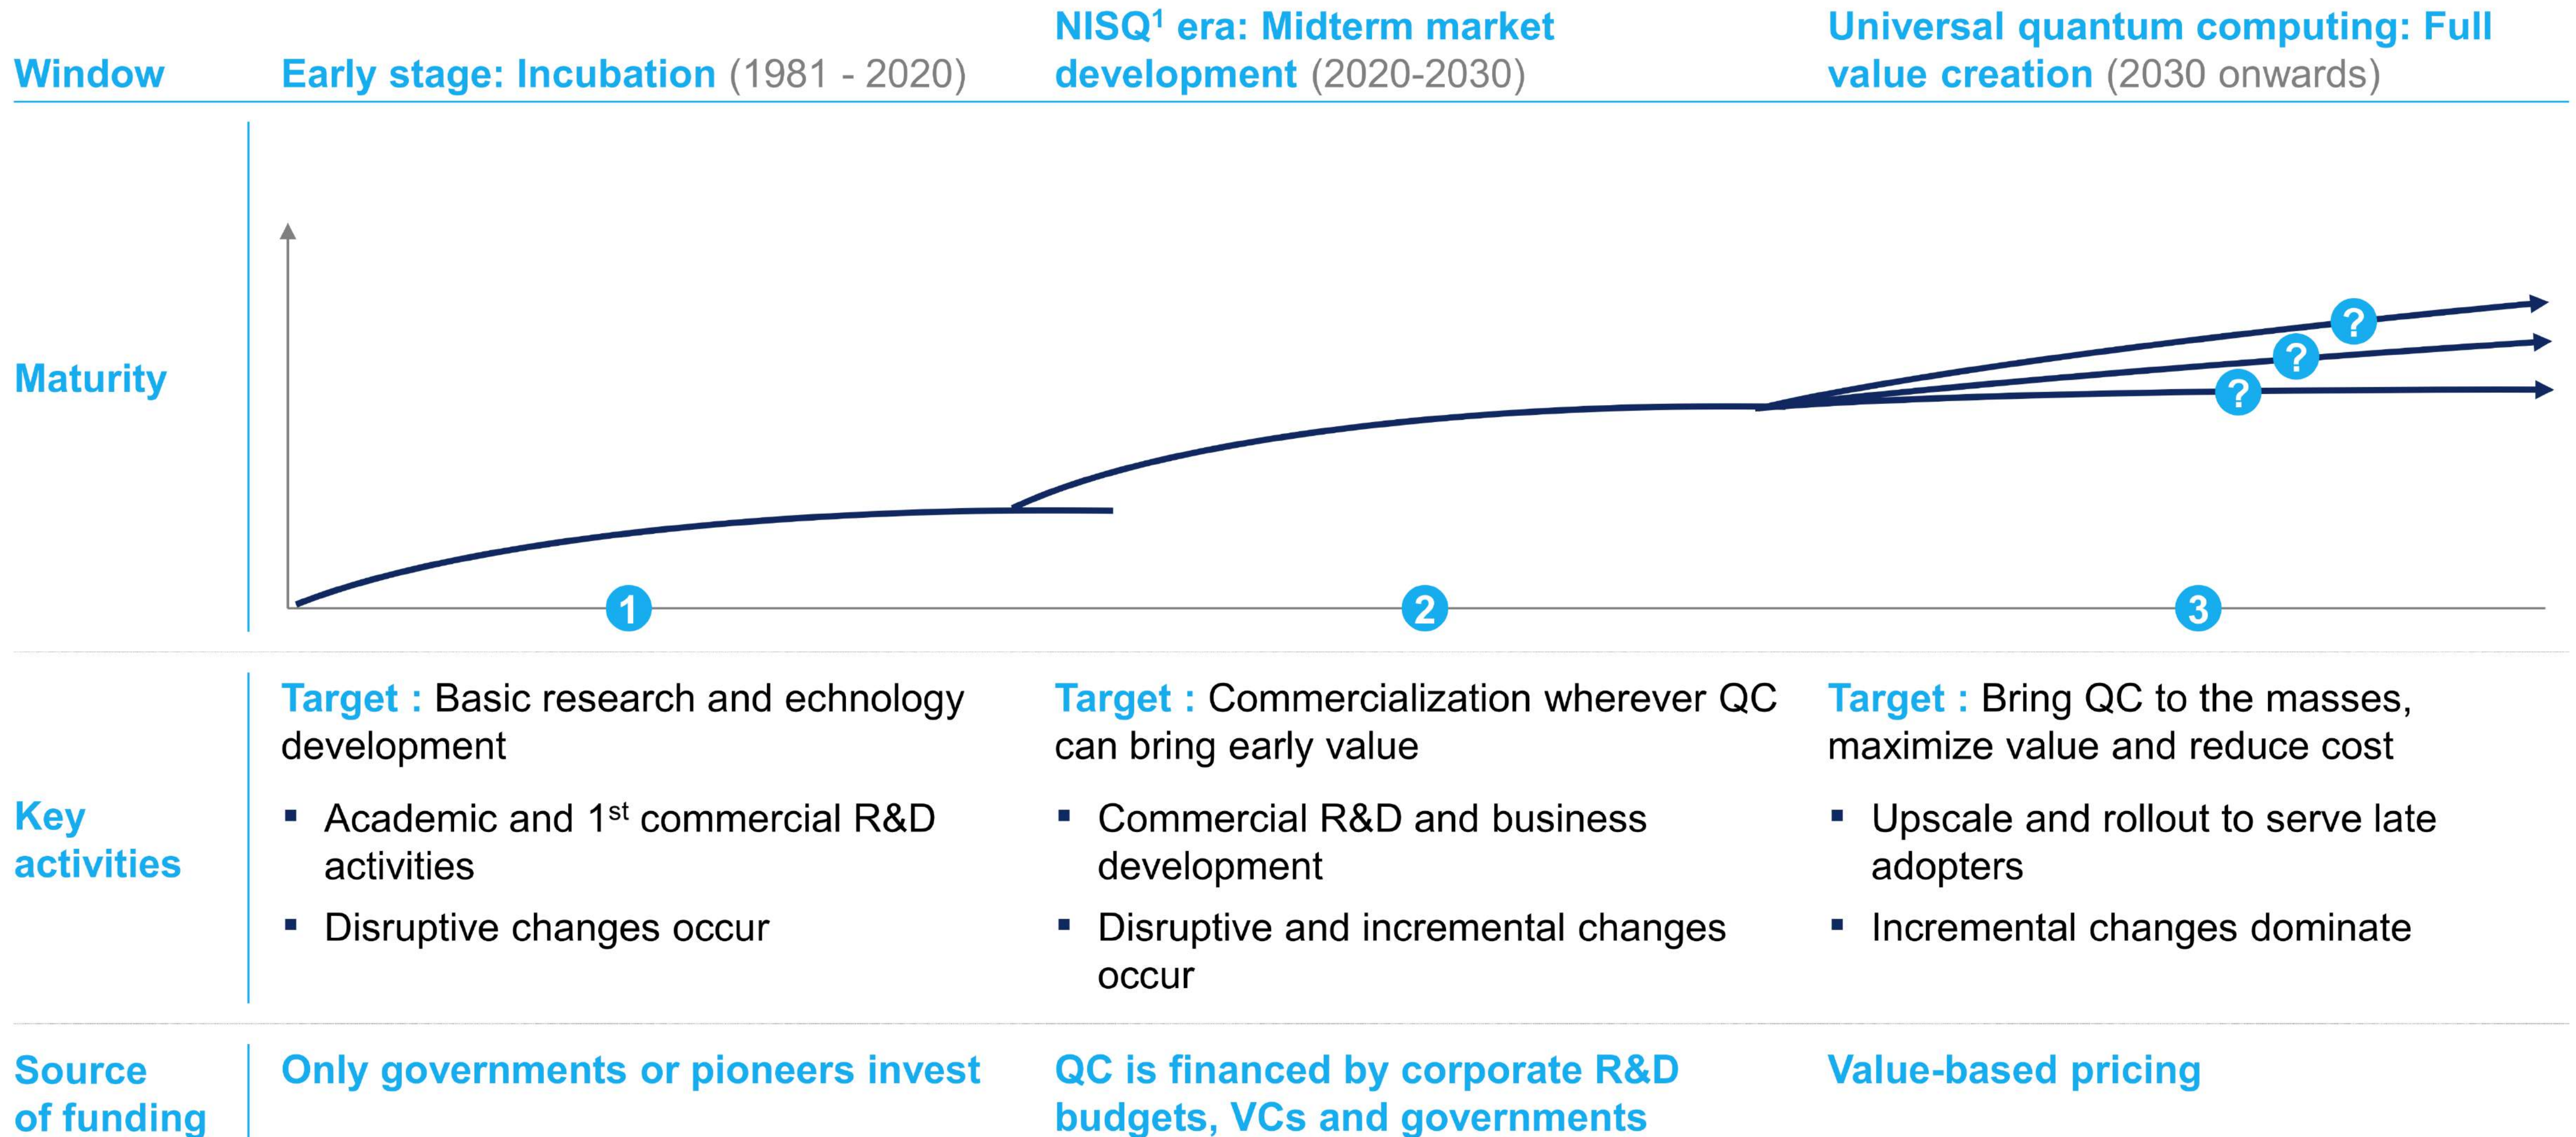

### 3 The current value chain in quantum computing

- As of 2019, the value chain is fragmented as the industry has not settled on one hardware concept and on one dominant business model
- Especially startups tend part play in several areas of the value chain, e.g. covering hardware and the ancillary software interface
- Specialization and consolidation is expected once QC becomes more mature

**4** The quantum computing market is likely to develop in distinct phases – by the early-to-mid 2020ies, a critical window will be reached

<sup>1</sup> noisy intermediate-scale quantum computers, a concept coined by John Preskill

# 5 The global quantum computing landscape – Europe is currently in a middle position between North America and Asia Pacific

Comparison of the number of QC players, funding and GDP (USD bn) per region in 2019

### Player distribution

- Enabling players
- Software players
- Hardware players

1 Estimate based on press search; 2 Considering public funding grants, including funded future grants; 3 based on claimed priority of patent families

# THE QUANTUM FLAGSHIP

culmination point uniting *all* stakeholders

A long-term, large-scale research initiative

Foster world-leading knowledge and skills

**Bring quantum technologies** from the **lab** to  
the **market**

Develop technologies and open research  
facilities for quantum in Europe

Bring together research institutions,  
academia, industry, enterprises, and policy  
makers, in a joint and **collaborative**  
**initiative** on an unprecedented scale

# GOALS

## FLAGSHIP'S VISION FOR QUANTUM TECHNOLOGIES IN EUROPE

Consolidate and expand European **scientific leadership** and **excellence** in quantum research

Kick-start a **competitive** European industry in quantum technologies and position Europe as a **leader** in the future global industrial landscape

Make **Europe** a **dynamic** and **attractive** region for innovative **research, business** and **investments** in quantum technologies

# THE QUANTUM FLAGSHIP AT A GLANCE

October 2018

2000+  
experts

10 years

1 billion €

2018-2021  
Ramp-up phase

141 proposals

20 projects

# APPLICATION PILLARS

4 projects

For a Secure Digital Society and a Quantum-enabled Internet

Quantum Internet - secure communication and applications

2 projects

Simulating Complex Systems for Advanced Design and Development

By 2021 quantum simulators 20x more precise

4 projects

Bringing Accuracy And Performance To Unprecedented Levels

By 2021, sensors with resolution 1000x better

2 projects

Computing Power To Overcome Currently Unsolvable Problems

By 2021, quantum computers of 50-100 qubits demonstrating first quantum

7 projects

Addressing Foundational Challenges For Development Of Quantum Technologies

Discover & understand new fundamental quantum principles

QUANTUM Computing

**PROJECT: AQTION**  
(Advanced quantum computing with trapped ions)  
**Coordinating Institution:**  
UNIVERSITÄT INNSBRUCK  
**Coordinator:** Thomas Monz

2 projects

**PROJECT: OpenSuperQ**  
(An Open Superconducting Quantum Computer)  
**Coordinating Institution:**  
UNIVERSITÄT DES SAARLANDES  
**Coordinator:** Frank Wilhelm-Mauch

## QUANTUM Communication

4 projects

### PROJECT: CiViQ

(Continuous Variable Quantum Communications)

#### Coordinating Institution:

ICFO - THE INSTITUTE OF PHOTONIC SCIENCES

Coordinator: Valerio Pruneri

### PROJECT: QIA

(Quantum Internet Alliance)

#### Coordinating Institution:

TECHNISCHE UNIVERSITEIT DELFT

Coordinator: Stephanie Wehner

### PROJECT: QRANGE

(Quantum Random Number Generators: cheaper, faster and more secure)

#### Coordinating Institution:

UNIVERSITE DE GENEVE

Coordinator: Hugo Zbinden

### PROJECT: UNIQORN

(Affordable Quantum Communication for Everyone: Revolutionizing the Quantum Ecosystem from Fabrication to Application)

#### Coordinating Institution:

AIT AUSTRIAN INSTITUTE OF TECHNOLOGY GMBH

Coordinator: Hannes Hübel

Quantum Flagship, 2019

## QUANTUM Simulations

**PROJECT: PASQuaS**

(Programmable Atomic Large-Scale Quantum Simulation)

**Coordinating Institution:**

MAX-PLANCK-GESELLSCHAFT ZUR FORDERUNG DER WISSENSCHAFTEN EV

**Coordinator:** Immanuel Bloch

2 projects

**PROJECT: Qombs**

(Quantum simulation and entanglement engineering in quantum cascade laser frequency combs)

**Coordinating Institution:**

CONSIGLIO NAZIONALE DELLE RICERCHE

**Coordinator:** Augusto Smerzi

4 projects

## QUANTUM Sensing and Metrology

### PROJECT: ASTERIQS

(Advancing Science and TEchnology thRough dia-  
mond Quantum Sensing)

#### Coordinating Institution:

THALES SA

**Coordinator:** Thierry Debuisschert

### PROJECT: iqClock

(Integrated Quantum Clock)

#### Coordinating Institution:

UNIVERSITEIT VAN AMSTERDAM

**Coordinator:** Florian Schreck

ASTERIQS

4 projects

**QUANTUM Sensing and Metrology**

**PROJECT: MetaboliQs**

(Leveraging room temperature diamond quantum dynamics to enable safe, first-of-its-kind, multimodal cardiac imaging)

**Coordinating Institution:**

FRAUNHOFER GESELLSCHAFT ZUR FOERDERUNG DER ANGEWANDTEN FORSCHUNG E.V.

**Coordinator:** Christoph Nebel

**PROJECT: macQsimal**

(Miniature Atomic vapor-Cells Quantum devices for Sensing and Metrology AppLications)

**Coordinating Institution:**

CSEM CENTRE SUISSE D'ELECTRONIQUE ET DE MICROTECHNIQUE SA - RECHERCHE ET DEVELOPPEMENT

**Coordinator:** Jacques Haesler

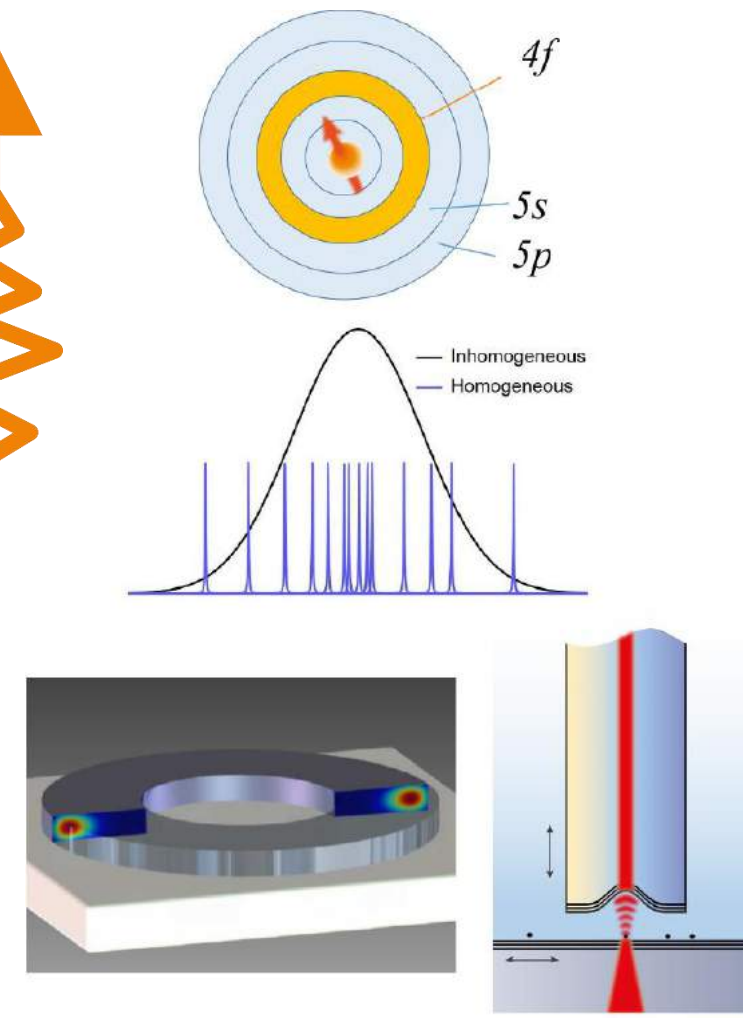

macQsimal 

**SQUARE**

**QUANTUM Basic Science**

7 projects

**PROJECT: S2QUIP**  
(Scalable Two-Dimensional Quantum Integrated Photonics)

**Coordinating Institution:**  
KUNGLIGA TEKNISKA HOEGSKOLAN  
**Coordinator:** Klaus Jöns

**PROJECT: 2D-SIPC**  
(Two-dimensional quantum materials and devices for scalable integrated photonic circuits)

**Coordinating Institution:**  
ICFO - THE INSTITUTE OF PHOTONIC SCIENCES  
**Coordinator:** Dmitri Efetov

**PROJECT: QMiCS**  
(Quantum Microwave Communication and Sensing)

**Coordinating Institution:**  
BAYERISCHE AKADEMIE DER WISSENSCHAFTEN  
**Coordinator:** Frank Deppe

**PROJECT: SQUARE**  
(Scalable Rare Earth Ion Quantum Computing Nodes)

**Coordinating Institution:**  
KARLSRUHER INSTITUT FUER TECHNOLOGIE  
**Coordinator:** David Hunger

7 projects

**PROJECT: PhoG**

(Sub-Poissonian Photon Gun by Coherent Diffusive Photonics)

**Coordinating Institution:**

THE UNIVERSITY COURT OF THE UNIVERSITY OF ST ANDREWS

**Coordinator:** Natalia Korolkova

**PROJECT: PhoQuS**

(Photons for Quantum Simulation)

**Coordinating Institution:**

SORBONNE UNIVERSITE

**Coordinator:** Alberto Bramati

**PROJECT: MicroQC**

(Microwave driven ion trap quantum computing)

**Coordinating Institution:**

FOUNDATION FOR THEORETICAL AND COMPUTATIONAL PHYSICS AND ASTROPHYSICS

**Coordinator:** Nikolay Vitanov

# QUANTERA

November 2016

QuantERA ERA-NET cofund initiative  
→ ERA-NET aims to increase Member States funding to challenge driven research and innovation agendas

€67 million budget from European Commission and national funding agencies

26 European countries

National and regional research funding programmes

Complementary to the Quantum Flagship's activities

# FROM VISION TO REALITY – THE EU’S COMMITMENT

Built with the support of the Commission’s proposed Horizon Europe and Digital Europe programmes

## HORIZON EUROPE

## DIGITAL EUROPE

### QUANTERA

### QUANTUM FLAGSHIP

### QUANTUM COMMUNICATION INFRASTRUCTURE (QCI)

### QUANTUM COMPUTING INFRASTRUCTURE

Give **funding support** to **international research projects** in the field of Quantum Technologies

Bring quantum **technologies** from the **lab** to the **market** and **consolidate** European **scientific leadership** in quantum research

**Build** and **deploy** in the next decade a certified secure pan-European end-to-end QCI for **cybersecurity** services

**Build** and **deploy** an infrastructure for big data, artificial intelligence, high performance computing, among others

# QUANTUM COMMUNICATION INFRASTRUCTURE

Integrate quantum cryptography into critical communication systems

Protection of data networks, clock synchronization, e-voting,...

Combine terrestrial and satellite components for wide coverage

Backbone infrastructure for the quantum internet

# QUANTUM COMPUTATION & SIMULATION INFRASTRUCTURE

Classical quantum  
simulation hardware in  
HPC

Quantum computation and  
simulation hardware (ion  
traps, super-/semi-  
conducting qubits, spin  
qubits, photonic circuits,  
neutral atoms)

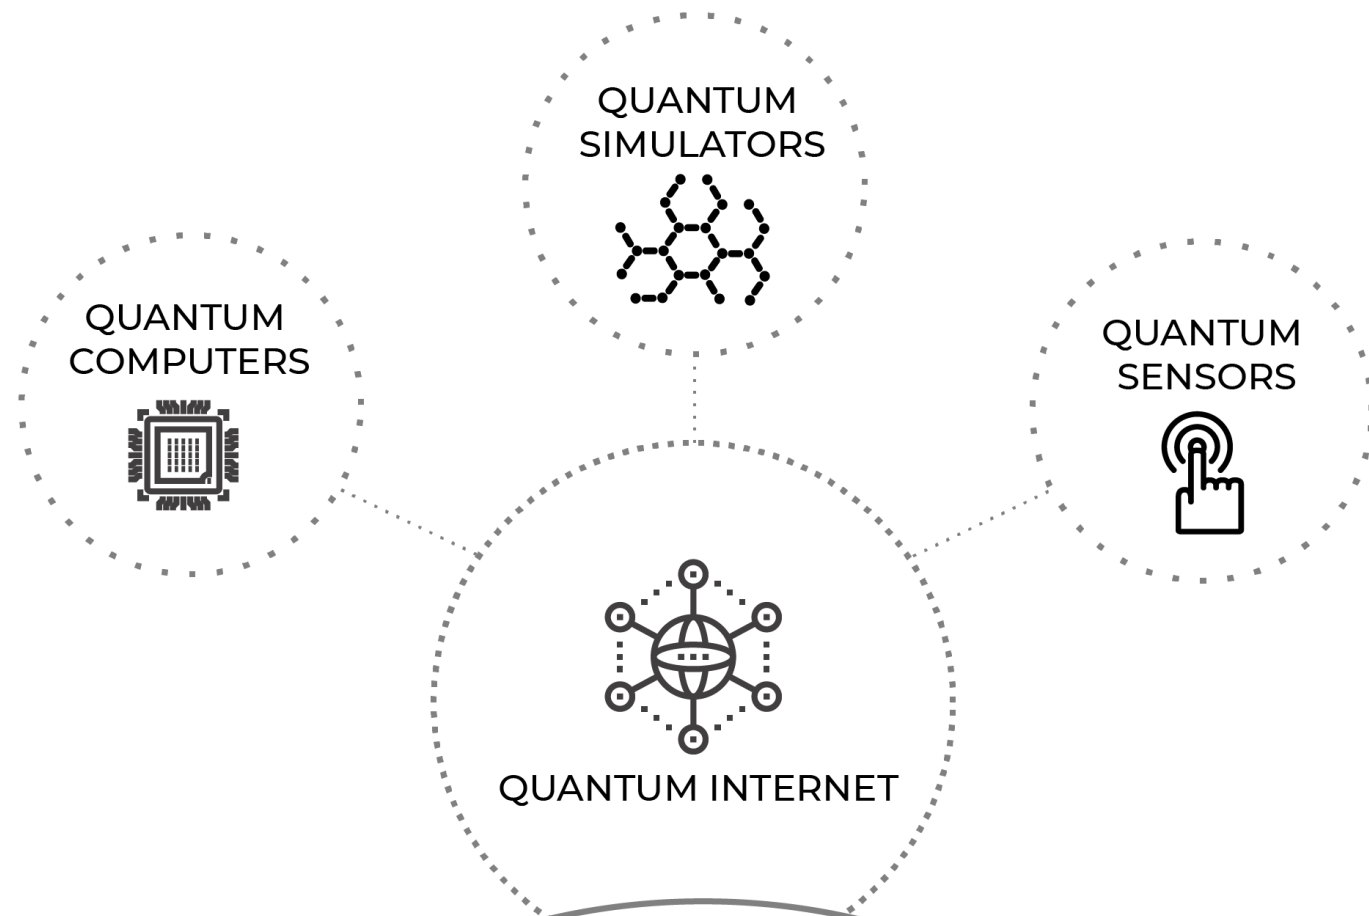

Quantum testbed  
facilities for hardware  
developers

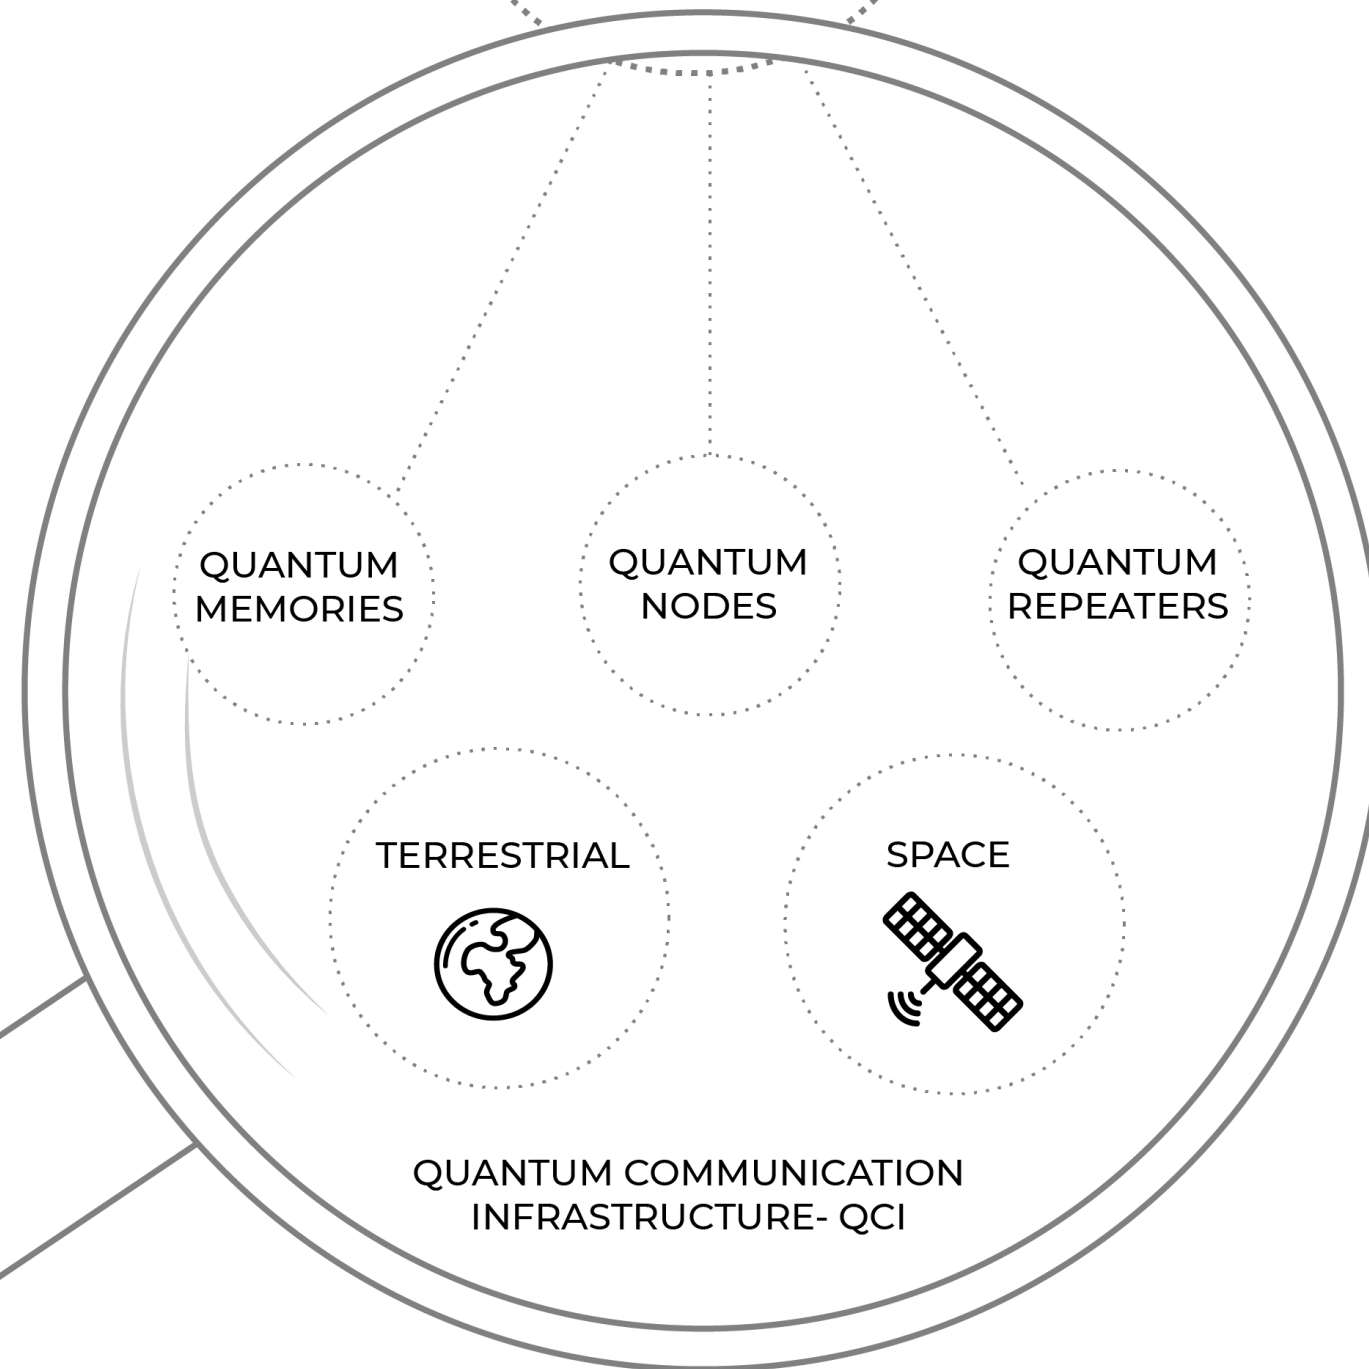

Quantum application  
database  
(verification/validat  
ion, algorithms,  
apps)

# QUANTUM INTERNET: THE ULTIMATE GOAL

QUANTUM COMMUNICATIONS

→ Distributed quantum computers, and quantum sensors interconnected via quantum communication networks
